DETAILED ACTION

Response to Amendment

In response to the amendment filed 24 February 2003, claims 2, 5, 8-10, 12, 14, and 16 are cancelled, claims 1, 3, 6, 7, 11, and 13 amended, and claims 19-22 added. Claims 1, 3-4, 6-7, 11, 13, 15, and 19-22 are pending.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1, 3-4, 6-7, 11, 13, 15, and 19-22 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The claims are rejected under 35 U.S.C. 112, second paragraph, as being incomplete for omitting essential elements, such omission amounting to a gap between the elements. See MPEP § 2172.01. The omitted elements are the elements that will allow light emission to occur. The devices of these claims are claimed as light emitting devices, however there is nothing in the claims to suggest any light emission. Only the structure of an electrode on the light emitting device is claimed. More structure must be added to the claims so that one skilled in the art may expect light emission to occur, for example, structure such as shown in Fig. 1, including layers 12, 14a, 14b, 16, 17, 18a, 18b.

Application/Control Number: 09/456,531

Art Unit: 2828

Allowable Subject Matter

Claims 1, 3-4, 6-7, 11, 13, 15, and 19-22 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, second paragraph, set forth in this Office action. The following is a statement of reasons for the indication of allowable subject matter:

There is not taught or disclosed in the prior art an electrode structure having the insulating layer as claimed, where poles of polyimide have a harder, insulating layer formed on the sides, and another layer of polyimide is buried between the poles. There is further not taught or disclosed in the prior art a light emitting device having such an electrode structure.

Response to Arguments

Applicant's arguments, filed 24 February 2003, have been fully considered and are persuasive. Therefore, the rejections have been withdrawn. However, upon further consideration, a new ground of rejection is made as shown above.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to James A. Menefee whose telephone number is (703) 605-4367. The examiner can normally be reached on M-F 8:30-5.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Paul Ip can be reached on (703) 308-3098. The fax phone numbers for the organization where this application or proceeding is assigned are (703) 872-9318 for regular communications and (703) 872-9319 for After Final communications.
